	Google Inc

Personal Achievements

- Attained fluency in Mandarin
- Completed a Vipassana course
- Deadlifted over 3x my body weight
- Finished a 5000Km solo bicycle trip

Projects

WhereRnR

Full Stack Hospitality Marketplace

- Built a searchable marketplace with React and React Native that allows hosts to rent out their properties
- Leveraged Redis to establish easy communication between host and guest through instant messaging
- Allowed users with appropriate authorization to build, edit, view, and delete listings
- Deployed the frontend to Netlify and backend to Heroku

Slash
Slinger
Slasher

Full Stack Team Oriented Messenger

- Created a full stack application that allows users to communicate with instant messenger through public, private, and direct channels
- Went beyond basic text messaging by allowing pictures and files to be shared
- Used authorized routes to prevent unexpected data access
- Dockerized the application, making it easy to reproduce regardless of platform

Certifikit-kat

Full Stack Certification Generator

- Constructed a full stack application that allows users to create templates and share certifications with recipients
- Set up dynamic generation of recipient certification and email based on the owner's credentials
- Maintained a docker friendly structure throughout the application

Work experience

March 2017
- Present

Freelance

Cambodia/Taiwan

- Collaborated with teams to create production level casino applications
- Assisted teams in finishing time constricted sprints and development cycles
